

Investment Objective and Policy

The Fund's investment objective is to provide capital growth and income over the long-term, by investing primarily in a diversified portfolio of equities listed in the Athens Exchange. The Fund invests in equities of companies which have economic activities in any sector or geographic area, with no limitation regarding their capitalization.

The Fund is actively managed. The investment process follows a bottom-up approach, combining qualitative and quantitative analysis of fundamental factors to assess the attractiveness and prospects of individual companies, while also considering sector dynamics. We select securities based on a company's growth potential, balance sheet strength, corporate governance, and valuation. The Fund manager can be quite flexible in adjusting the portfolio, in order to take advantage of short-term market fluctuations or any opportunities that may arise.
