

Investment Objective and Policy

The Fund's investment objective is to provide capital growth and income over the medium to long-term, through the active management of a diversified asset allocation portfolio, investing primarily in international markets.

In order to achieve its objective, the Fund invests in euro-denominated bonds issued by companies, governments or authorities and entities related to governments, equities listed on international exchanges and the Athens exchange, as well as money market instruments and deposits with credit institutions. The Fund invests in investment grade bonds, with the exception of its potential exposure to Greek debt securities.

The Fund is actively managed. Our investment process is based on quantitative and qualitative assessment of fundamental factors, with the purpose of identifying those asset classes that offer the highest risk-adjusted expected returns, along with selecting individual securities.
